

PRODUCT LIST

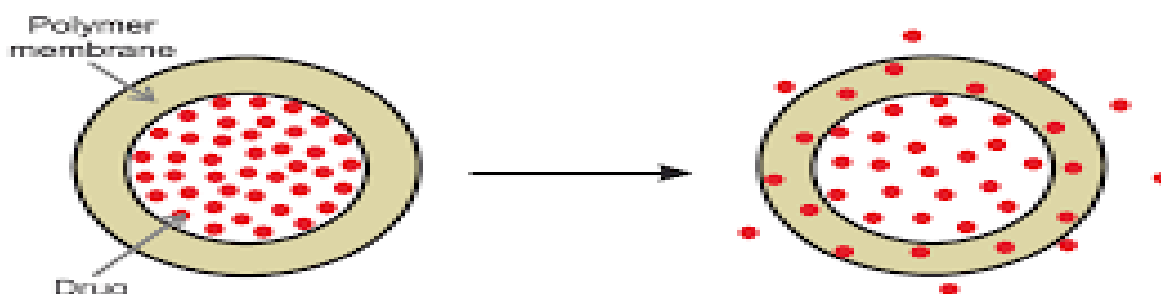

We are pleased to introduce our Manufacturer of Pharmaceutical **Ready-Mix Tablet Coating Material (Like-Film, Enteric, seal, sugar film, Controlled Release Drug Delivery System, metallic film etc.), Polymers and Resins.**

We are associated with leading, renowned, pharmaceutical manufacturer with a vast product portfolio. We welcome requirements of:

READY-MIX TABLETS COATING MATERIAL: Like -

a. Film-Coat (Aqueous, Non-Aqueous, Matelic Colour Base), Code under given below:

- **AQ-Z Wb** : Aqueous or water base film white or in colour coat.
- **Aq-ZWt10** : Aqueous or water base film extra white in coat for Calcium, Azith. etc.,
- **NaQ-Z1Wb** : Non-Aqueous or solvent base film white or in colour coat.
- **NaQ-Z1Wt10** : Non-Aqueous or solvent base film extra white in coat.
- **UZI** : Universal Film Coat material.
- **SFC101** : Non-Aqueous Sugar film coat material.
- **MNaqxxx: Matelic Non-Aqueous or solvent base film coat in different colour.**

MD3012

MSY2512

MS2222

MERY2318

MG221801

MCP723

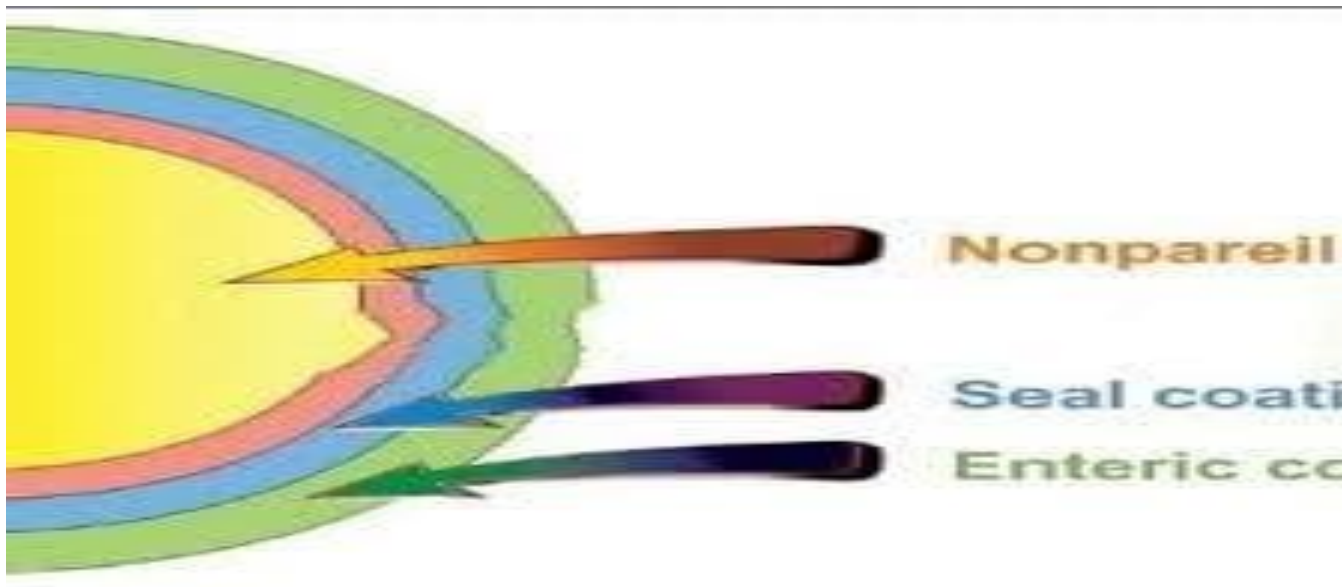

MY3601

b. Enteric-Coat Material, Code under given below:

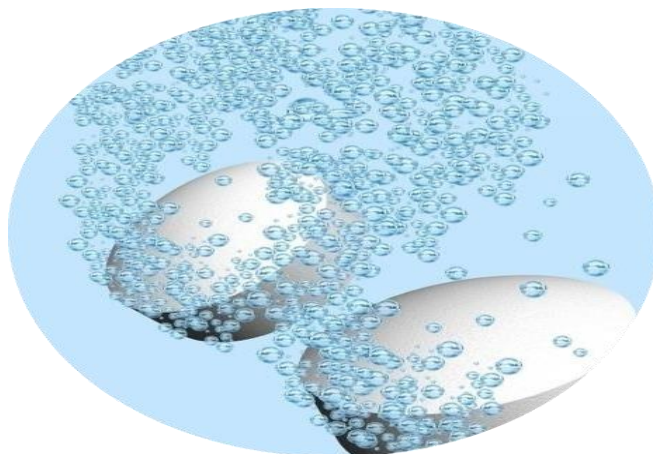

- **ECM-RP347 (Methacrylic Base) Non-Aqueous Base.**
: For Pantoprazole group or Dissolution enteric Tablets.
- **ECM-RP348 (Methacrylic Base) Aqueous Base.**
: For Diclofenac and serratiopeptidase enteric Tablets.
- **ECPT5 (phthalate Base)**
: For Duloxetine enteric Tablets.
- **ECMS (Methacrylic Base II Ind Bond)**
: For Mesalamine enteric Tablets.
- **EC714 (CAP Base)**
: For Diclofenac and Serratiopeptidase enteric tablets.

c. Seal-Coat Transparent, Colour White etc. Code under given below:

- **SC-401**
: Transparent Layer seal coat or precoat for enteric coat Pantoprazole group.
- **SC-501**
: Colour or white seal coat.

d. Moisture Barrier (Film-Coat Non-Aqueous). Code under given below:

- **CVS-101** : Moisture Barrier solvent base extra white in Film coat special for Amoxy+Clav Tablet.
- **PA-Wt10** : Solvent base extra white in Film coat special for plain Amoxy or dissolution Tablets.
- **MB 31RP** : Solvent base Moisture Barrier Film coat special for Multivitamins, Ferrous groups Tablets.
- **AC-8** : Moisture Barrier solvent base film coat special category Tablets.

e. Ready-Mix Taste Mask, Code under given below:

To mask the taste and odour of drugs, pharmaceutical formulations employ various techniques, including using flavors and sweeteners or solid dispersions.

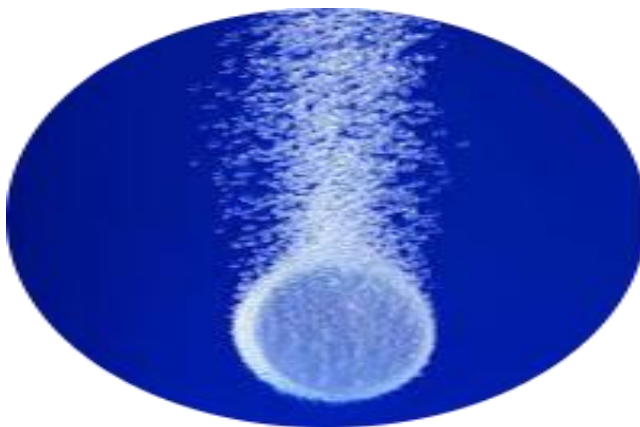

Rglax-Resin RT-114 taste mask for

- **RT-114** : Azithromycin Suspension and Ofloxacin Suspension.

f. Dissolution Profile Material, Code under given below:

Rglax-Resin RT314 (Dissolution Enhancer Blend)

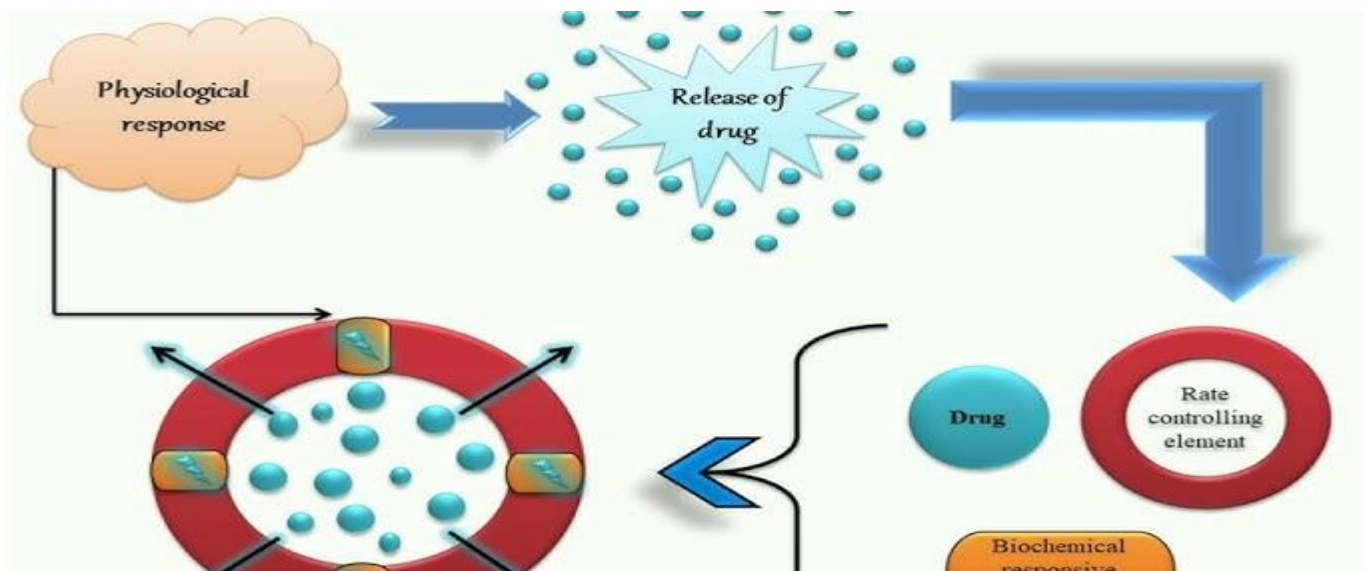

- **RT314** : DT And Dissolution material.

g. Sustained Release Material, Code under given below:

RGLAX-SR¹⁰⁰ Sustained Release material.

• **SR100** : Sustained Release material.

h. Hygroscopic Adsorbent Material, Code under given below:

Rglax-Resin^{HR100} (Hygroscopic Adsorbent Material)

HR100, basically hygroscopic adsorbent material and can be used for hygroscopic drugs, it works effectively on Sodium Valproate, L-carnitine, Valproate Sodium and all other drugs which are hygroscopic and creates problem during compression and afterward

4/4.

Works: Plot No.30, Industrial area phase-III Tahliwal-174507 Distt. Una H.P.
